PTC THERMISTOR LEADED TYPE FOR TEMPERATURE SENSING

muRata
Innovator in Electronics

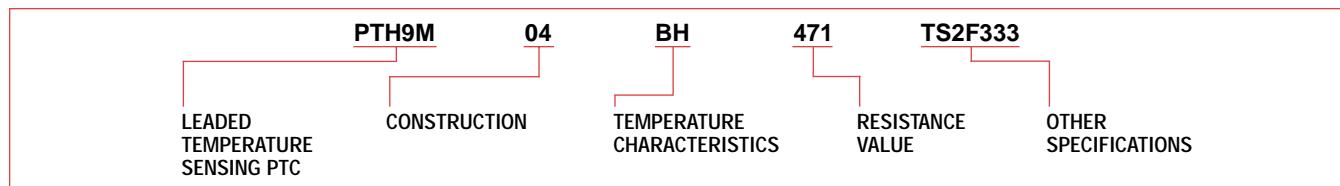

PTH9L/M Series

FEATURES

- The PTH9L/M offers an excellent temperature sensing ability, exhibiting a steep change in electrical resistivity near the temperature setting.
- The PTH9M has been developed for protecting power transistors, thyristors, stereo main amplifiers, etc. from overheating and also for sensing the temperature of other components which may overheat.
- The PTH9L type is usable as a sensor for temperature in air.
- The PTH9M type is a screw-fixing type and the PTH9L type is a lead type; therefore, mounting is easy.
- The PTH9M type and the PTH9L type have the same temperature characteristics, providing selection based on mounting method.
